Invest India

Shri Nilaya Varma
CEO & Co-Founder, Primus
Partners

Session Theme

Government of India has embarked on a mega transformation journey to revolutionize the health sector in India. To achieve it, Government of India launched **National Digital Health Mission (NDHM)**.

The vision of National Digital Health Mission (NDHM) is to create a national digital health ecosystem which provides timely and efficient access to inclusive, affordable, and safe healthcare to all citizens. NDHM will significantly improve the efficiency, effectiveness, and transparency of health service delivery and will be a major stride towards achievement of the United Nations Sustainable Development Goal of Universal Health Coverage.

NDHM is envisioned to be a complete digital health ecosystem with four key features – National Health ID, personal health records, Digi Doctor and health facility registry. At a later stage, it will also include e-pharmacy and telemedicine services, regulatory guidelines for which are being framed.

In this regard, it is proposed to explore bilateral collaborations between Dutch and Indian organisations in the Healthcare sector, especially with respect to National Digital Health Mission.

Session Objectives

- Develop greater understanding of National Digital Health Mission (NDHM) and potential opportunities to collaborate
- Identify potential areas of partnerships between both countries and co create solutions
- Explore market opportunities in India, combined with the Netherlands' strengths in areas such as Digital Health, Medical devices and Diagnostics etc to create excellent opportunities for partnerships
