WEBINAR 'WASTE MANAGEMENT'

11:30 hrs. – 13:00 hrs. CET/ 16:00 hrs. – 17:00 hrs. IST

Wednesday 19 January 2022

The Ministry of Interior and Kingdom Relations of the Kingdom of the Netherlands and the Ministry of Housing and Urban Affairs of the Government of India are jointly organizing a Webinar on “Waste Management “- including waste to energy.

In both countries, less waste and better waste management are the need of the hour as strides are being taken towards a more circular approach.

The aim of this Webinar is to share knowledge and best practices, give insight into the stage of development the different cities are in and what the opportunities are for corporate players.

In the first part two Dutch municipalities with two Dutch corporates will showcase the steps they have taken and plan to take, the lessons learnt and highlight technological solutions that may be interesting within an Indian context. Additionally, IHE Delft Institute for Water Education will give a presentation on the biological processes for transitioning waste management into the circular bioeconomy.

In the second part several Indian cities will illustrate the steps they have taken within the framework of the smart cities policy regarding waste management, what issues they are currently facing and showcase the opportunities for corporate players.

The Webinar is aimed at corporates and municipalities in both the countries.
